

Job Title: Senior Developer
Reports To: Development Manager
Supervises: None
Department: Technology

ClickMotive is looking for a Sr. Developer with demonstrable C#, JavaScript/HTML/CSS experience - ASP.NET MVC is a plus! We're looking for people that believe learning and continuous improvement are primary responsibilities of a developer. You will go directly to the top of our list if you are active in the tech community (attendance of events, blog reader + commenter, open source project contributor, etc.).

Responsibilities:

- A desire to make work fun and enjoyable (this is first on the list for a reason).
- Participation in all aspects of an agile environment.
- Developing automated tests, predicting areas of risk, and coordinating with our QA staff to achieve the best blend of error prevention and error detection possible.
- Build scalable software through architecture discussions with the development team.
- Test-driven development.
- Continuous integration.

Requirements:

- 5+ years of experience in software development, application or systems programming or related position.
- SQL Server (2005 or higher) database design and implementation, including Transact SQL and stored procedures.
- C#
- .NET 3.5+

Strongly Desired:

- JavaScript frameworks (jQuery, Ext JS).
- Experience with Testing (unit, integration, usability).
- Familiarity with HTML, CSS, JavaScript, and developing a cross-browser compatible website.
